mahmud886.vercel.app

Dedicated Software Engineer with 7+ years of experience across front-end and back-end development. Specialised in React, Next.js and TypeScript, building scalable, high-performance and beautifully animated interfaces. Skilled in writing clean, maintainable, DRY code that speeds up delivery and minimises debugging time. Passionate about continuous learning and staying current with technology.

Skills

Expertise: HTML, CSS, SCSS, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js, Next.js, Redux Toolkit.

Comfortable: TypeScript, Node.js, Express.js, MongoDB, MySQL, Supabase.

Motion & 3D: GSAP, Framer Motion, Three.js / R3F.

Quality & Tooling: Jest, React Testing Library, Cypress, Storybook, Git / GitHub / GitLab, CI/CD, Scrum.

Professional Experience

Software Engineer

Adventure Dhaka Limited, Dhaka

Nov 2024 – Present

- Spearheaded scalable UI development using JavaScript (ES6+), React.js and Next.js, establishing reusable component-based architectures for consistent design and a better user experience.
- Optimised application speed through lazy loading and Next.js SSR, while managing complex data flows with React Context and Redux Toolkit.
- Ensured high code quality and smooth deployments with unit/integration testing, rigorous code reviews and Git/GitHub/GitLab within Scrum.

Web Developer

Nexdecade Technology Pvt. Ltd., Dhaka

Aug 2023 – Oct 2024

- Led development and optimisation of high-traffic applications serving 2M+ daily users, transforming UIs with React, Angular and Laravel for a 30% gain in system efficiency, 31% more user engagement and a 25% performance boost.
- Engineered and secured six-step encryption-decryption REST APIs with a 100% success rate, improving reliability by 20%, UX by 30% and cutting debugging time by 62%.
- Drove Agile delivery and cross-functional collaboration, improving workflow efficiency by 30%, holding 100% coding-standard adherence and mentoring 2 junior engineers.

Web Developer

Hogarth Dhaka, Dhaka

Dec 2021 – Aug 2023

- Drove digital asset production and UI development: 300+ HTML email templates, 100+ JavaScript animations and responsive web assets with 90%+ device compatibility, lifting engagement by 20–25%.
- Engineered secure REST APIs and optimised UI performance — 100% API success rate, 30% better UX and a 25% performance boost.
- Implemented Agile practices across teams, cutting project timelines by 15% and improving workflow efficiency by 30%.

Web Developer

Kaizen IT Ltd, Dhaka

Sep 2021 – Nov 2021

- Engineered and integrated full-stack web solutions with React, Node.js, Express and MongoDB at a 100% integration rate, delivering UI/UX designs and prototypes for 100% project execution success.

Web Developer

Oxdora I Tech, Dhaka

Jan 2021 – Aug 2021

- Developed official websites and web applications with 100% project execution success, increasing client satisfaction through enhanced functionality, while managing clients and training agents.

Selected Projects

Dev Visualize dev-visualize.vercel.app

Interactive learning platform · Own project

Mar 2026 – Present

- Turns complex web-development concepts into animated, step-by-step visual explanations with smooth, performant motion.
- Interactive simulations with pause, step-through and speed control.
- Modular scenarios: request lifecycle, React reconciliation, PWA service worker.

Stack: Next.js 16, React 19, TypeScript, Framer Motion, GSAP, Three.js

Sporefall www.sporefall.com

Gen-AI sci-fi micro-drama platform · Adventure Dhaka Limited

Feb 2026 – Present

- Narrative storytelling, community forums and a commerce storefront — with edge analytics and custom moderation tooling.
- Public website: episode viewing, audience voting, merch store, Stripe checkout and donations.
- Admin OS dashboard: an internal CMS for episodes, polls, blogs, analytics and orders with a Tiptap editor and Recharts.

Stack: Next.js 16, Supabase, Stripe, Zustand, Framer Motion, Tiptap, Recharts, Radix UI, @dnd-kit

- Storefront for a terpene manufacturer with account management, dynamic pricing rules and sub-second LCP.
 - Reusable design system with Storybook and visual regression.
 - Inventory and pricing engines with admin dashboards.
- Stack:** Next.js, React, Tailwind CSS, SSR, Storybook, Node.js, PostgreSQL

Noor — Islamic lifestyle platform. A calm, glass-morphic Islamic companion — prayer times, Quran and dhikr. Bangla-first, English second, architected for Arabic and Urdu; verified content served statically from the server.

Khan Associates — Corporate website. Bilingual marketing and profile site for a Dhaka tax & legal consulting firm established in 2001 — built with zero UI kits and a hand-rolled icon set.

RestaurantOS — Multi-tenant SaaS. A multi-tenant, dynamic-QR restaurant platform with subdomain routing per restaurant, bilingual UI and tenant-scoped theming.

AVYRA — Commerce design system. A universal commerce design system and adaptive storefront architecture: one codebase, many storefronts — tech, fashion, luxury, marketplace — composed from configuration, not forks.

Education

Southeast University, Dhaka B.Sc. in Computer Science & Engineering, CGPA 3.02	2022
Mymensingh Ideal College HSC, Science	2013 — 2015
B.M High School SSC, Science	2007 — 2013

Certifications

Reactive Accelerator — Batch 1 Learn with Sumit (LWS) · Credential ID LWSCTXN-UZELD7KP	Jan 2024 – Jun 2024
Complete Web Development Programming Hero	Jan 2020 – Apr 2020
